NEXZIBYTE
SOLUTIONS PVT LTD

COMPANY PROFILE

AI-First Technology & Digital Transformation Partner

Building intelligent software, digital products and scalable technology solutions for modern businesses.

HYDERABAD, INDIA

NEXZIBYTE SOLUTIONS PVT LTD

Who We Are

NexziByte Solutions is an AI-first technology and product engineering company. We help organizations build, modernize, automate and scale — through custom software, enterprise solutions, intelligent automation and our own proprietary products, all delivered by one in-house team from first conversation to long-term support.

OUR VISION

To be a trusted technology partner delivering intelligent, scalable digital solutions across industries and markets.

OUR MISSION

To help organizations simplify complexity, improve operations and accelerate growth through intelligent, well-engineered technology.

WHAT WE DO

01
TECHNOLOGY CONSULTING
Strategy, architecture and solution discovery.

02
SOFTWARE ENGINEERING
Web, mobile, SaaS and enterprise applications.

03
AI & AUTOMATION
Applied intelligence built into real workflows.

04
PRODUCT ENGINEERING
Nivohra, ZivoraThemes and other proprietary products.

05
INDUSTRY SOLUTIONS
Technology shaped around how each industry actually works.

06
DIGITAL TRANSFORMATION
Modernization, automation, integration and scalable adoption.

Business Vision. Technology Leadership.

NexziByte is led by two founders whose responsibilities span the full arc of the company — from business leadership to technology and solution leadership.

Nagunoori Durgaprasad

FOUNDER & MANAGING DIRECTOR

Business Strategy · Growth · Partnerships · Client Leadership

Durgaprasad drives NexziByte's overall business direction, strategic growth, client relationships and partnerships — leading the company toward long-term opportunities and expansion across markets and industries.

- Business Vision
- Growth & Expansion
- Strategic Partnerships
- Client Relationships

Tejaswini Gangula

TECHNICAL DIRECTOR & OPERATIONS · CO-FOUNDER

Technology Strategy · Business Development · Solution Strategy · Operations

Tejaswini drives NexziByte's technology and solution direction, while also shaping business development, solution strategy and operational execution — translating business requirements into scalable technology solutions.

- Technical Vision
- Solution Architecture
- Engineering Direction
- AI & Emerging Tech

Our Technology Ecosystem

Five capabilities work together as one technology practice — from strategy through long-term support.

01

Consult

Strategy · Architecture · Solution Discovery

Understanding the business problem first, then defining the right technology approach and roadmap to solve it.

02

Build

Custom Software · Enterprise Apps · Product Engineering

Web, mobile, SaaS and enterprise applications engineered around real business workflows, from CRM and ERP to purpose-built platforms.

03

Intelligence

AI · Automation · Data · Computer Vision

Generative AI, AI agents, intelligent automation and computer vision applied where they create measurable business value.

04

Transform

Cloud · Modernization · Integration

Legacy modernization, cloud migration, system integration and digital transformation for growing organizations.

05

Scale

DevOps · Security · Support · Long-Term Partnership

CI/CD, infrastructure, cybersecurity practices, dedicated teams, AMC and ongoing support that scales with the business.

Industries We Serve

Technology built around the way your business actually operates — not one generic product sold to every industry.

Pharma & Healthcare
Compliance workflows, appointment systems, AI-enabled care platforms.

BFSI & Fintech
Digital platforms, CRM, workflow automation, AI and analytics.

Manufacturing
ERP, production, inventory, procurement, quality, computer vision.

Retail & E-commerce
E-commerce, POS, CRM, order management, analytics.

Real Estate & PropTech
CRM, listings, lead management, property visualization.

Solar & Renewable Energy
CRM, project tracking, monitoring, site visualization.

Education & EdTech
LMS, student management, learning portals, analytics.

Travel & Hospitality
Booking platforms, CRM, customer and mobile apps.

Logistics & Warehousing
Warehouse management, tracking platforms, vendor management, dispatch dashboards.

Custom Warehouse Management
Warehouse systems tailored to your inventory, inbound, outbound and dispatch.

Government & Smart City
AI surveillance and traffic intelligence, via Smart City AI.

Interiors, Construction & Infra
Project management, quotations, client portals.

Steel & Heavy Industry
ERP, inventory, production tracking, dealer systems.

IT & Software Companies
White-label delivery, dedicated teams, staffing.

Trade & Distribution
Inventory, accounts automation, dealer portals.

Don't see your industry?
Tell us your challenge and we will structure the right solution.

Products & Platforms

Alongside client engagements, NexziByte builds and evolves its own technology products — one of the things that sets us apart from a generic development agency.

N

Nivohra

AI HRTECH & VENDOR MANAGEMENT PLATFORM

An AI-driven workforce and vendor-management platform, built to bring hiring, workforce operations and vendor relationships into one system.

Z

ZivoraThemes

AI-POWERED DESIGN & TEMPLATE PLATFORM

A design and template platform that uses AI to speed up the creation of digital assets and interfaces.

T

TechTalk

TECHNOLOGY COMMUNITY & KNOWLEDGE PLATFORM

A community and knowledge-sharing platform for technology professionals and businesses.

S

Smart City AI

AI SURVEILLANCE & TRAFFIC MANAGEMENT

Computer-vision-driven surveillance and traffic-management capability aimed at government and municipal use cases.

Our Clients & Partners

Building relationships across technology, business and industry — a growing network of active clients and collaborators who trust NexziByte to deliver.

This reflects ongoing, active collaborations across NexziByte's client and partner network — and we are always looking to build relationships with more trusted clients and partners across industries.

Partner with NexziByte

Our Collaboration Ecosystem

Building with startups. Collaborating with technology companies. Supporting enterprise transformation.

Startups

MVP development, product engineering, technical architecture, AI integration and dedicated development teams.

Technology Companies

Technology collaboration, white-label development, delivery partnerships and API / system integration.

Enterprises

Digital transformation, enterprise application development, cloud modernization and AI initiatives.

Strategic Partners

Referral relationships, industry collaborations, joint opportunities and shared technology initiatives.

Why Organizations Choose NexziByte

1 AI-First Thinking

We assess each AI opportunity against the available data, business workflow and intended outcome to determine where intelligent automation creates real value.

2 Engineering Capability

Full custom software and enterprise technology development, in-house.

3 Product Mindset

We build and maintain our own products alongside client engagements.

4 Industry Understanding

Solutions adapted to the workflows of the industry they serve, not one-size-fits-all.

5 End-to-End Delivery

Strategy, design, development, deployment and support, under one roof.

6 Partnership Approach

Long-term relationships over one-time project handoffs.

7 Scalable Technology

Cloud-native, scalable architecture where the use case calls for it.

8 Flexible Engagement

Project delivery, dedicated teams, technology partnerships or ongoing support — as fits the need.

Our Values

The principles that shape how we work, build and engage with clients and partners.

Innovation	Applying new technology and ideas where they genuinely improve the outcome.
Integrity	Being direct about what a solution can and cannot do, from the first conversation.
Customer Success	Measuring our work by the outcomes it creates for the client, not just delivery.
Quality	Holding engineering and design to a standard that holds up under real use.
Ownership	Treating client problems, and our own products, as things we're accountable for.
Transparency	Clear communication on progress, trade-offs and decisions throughout an engagement.
Collaboration	Working alongside clients and partners, not at a distance from them.
Continuous Learning	Staying close to how technology is evolving, and applying that where it matters.
