NEXZIBYTE SOLUTIONS PVT LTD

SALES & SOLUTIONS BROCHURE

Build. Automate. Transform. Scale.

AI-powered technology solutions, customized for every industry — software, CRM, ERP, AI calling, billing and digital transformation, built around your business.

One technology partner. Every industry.

NexziByte Solutions is an AI-first technology and software engineering company. We build AI software customized to your industry, alongside custom applications, CRM and ERP, cloud, data, and complete digital transformation — for startups, SMEs and enterprises across every sector.

> Tell us your business requirement. Whatever your industry, we assess it and structure the right solution, service or partnership around it — not one fixed product for everyone.

WHAT WE DELIVER

- AI software, customized by industry
- Cloud, data & cybersecurity
- Digital transformation, end to end
- Computer vision & video analytics
- Custom software & product engineering
- API & system integration
- CRM & sales platforms
- 3D visualization & VR/AR, where useful
- ERP, accounts & billing
- Solar & renewable-energy technology
- AI calling & customer engagement
- Technology staffing & dedicated teams
- HRMS & LMS
- Managed services / AMC
- Web & mobile applications
- Technology & channel partnerships

> A client may arrive with an idea, a manual process, a CRM or ERP need, an AI use case, a legacy system, a staffing gap or a partnership opportunity. We assess the requirement and structure the right engagement around it.

Your requirement. Our solution.

Most businesses face a familiar mix of challenges. NexziByte works across the full technology lifecycle, so you do not need five vendors to solve five problems.

YOUR BUSINESS REQUIREMENT	OUR SOLUTION
Manual, repetitive processes	**AI & Intelligent Automation**
No centralized lead or customer view	**CRM & Sales Platform**
Disconnected finance and operations	**ERP, Accounts & Billing**
Calls and follow-ups eating your team's time	**AI Calling & Voice Automation**
Compliance-heavy, workflow-sensitive operations	**Pharma & Healthcare Solutions**
An idea, but no technical team	**MVP & Product Engineering**
Outdated, hard-to-maintain systems	**Legacy Modernization**
Need to show a property or product before it exists	**3D Visualization / VR, where it helps**
Interest in AI, no starting point	**AI Strategy & Implementation**
Systems that do not talk to each other	**API & System Integration**
Limited visibility into performance	**Data & Analytics**
Infrastructure that needs the cloud	**Cloud Transformation**
Ongoing needs beyond one project	**AMC / Dedicated Teams**
Want to grow through partners	**Technology & Channel Partnerships**

The full lifecycle, under one roof.

From the first conversation about a business problem to architecture, engineering, deployment and long-term support.

OUR COMPLETE SOLUTIONS PORTFOLIO

- AI & Intelligent Automation
- Computer Vision & Video Analytics
- AI Calling & Voice Agents
- UI/UX & Product Design
- Custom Software Development
- API & System Integration
- Web & Mobile Applications
- Pharma & Healthcare Solutions
- CRM & Sales Platforms
- Solar & Renewable Energy Tech
- ERP, Accounts & Billing
- 3D Visualization & VR/AR
- HRMS & LMS
- Digital Transformation
- SaaS & Product Engineering
- AMC & Technology Support
- Cloud & DevOps
- Dedicated Development Teams
- Data & Analytics
- Proprietary Products
- Cybersecurity
- Technology & Channel Partnerships

AI software, customized to your industry.

We assess each AI opportunity against your data, workflow and intended outcome, then apply intelligence where it creates measurable value — built around how your industry actually works.

AI & Intelligent Automation

Generative AI applications, AI agents for multi-step tasks, chatbots, OCR and document intelligence, NLP, predictive analytics and computer vision — applied to your specific workflow.

AI Calling & Voice Automation

AI-driven calling for leads, follow-ups, reminders and support, with call logs, transcripts and CRM sync — reducing manual calling load on your team.

CRM & Sales Platform

Lead and contact management, sales pipeline, follow-ups, customer lifecycle tracking, reports, dashboards and workflow automation, built around how your team actually sells.

ERP, Accounts & Billing

Finance, accounts and billing, sales and purchase, inventory and procurement, production, HR and reporting — connected in one system, configured to your industry.

Custom Software & Product Engineering

Web applications, SaaS platforms, internal tools and mobile apps engineered around your actual workflows, from MVP to scale.

HRMS & LMS

Employee and workforce management, recruitment, attendance and payroll workflows, alongside course management, training and learning portals.

NEXZIBYTE SOLUTIONS PVT LTD

Digital transformation, end to end.

Modernization, cloud, data, security and design — the foundation every industry solution is built on.

Digital Transformation

Legacy modernization, process digitization, workflow automation and AI adoption across your business.

Cloud & DevOps

Cloud architecture and migration, CI/CD, containerization, infrastructure management, monitoring and cost optimization.

Data & Analytics

Business intelligence, dashboards, reporting, data integration and predictive analytics.

Cybersecurity

Security and vulnerability assessment, penetration testing, application and infrastructure security, monitoring.

Computer Vision & Video Analytics

Image analysis, object detection, surveillance and monitoring, traffic intelligence. Government and municipal use cases are delivered through Smart City AI.

UI/UX & Product Design

Research, wireframing, prototyping, UI design and design systems for web and mobile.

API & System Integration

Connecting new solutions with the systems you already run.

3D Visualization & VR/AR

3D animation, dollhouse-style views and VR/AR walkthroughs, used where they help a customer see a property, product or plan before it exists.

AMC & Technology Support

Annual maintenance, application support and monitoring, continuous improvements and upgrades.

Technology built around your industry.

We do not apply one generic technology stack to every business. We understand the workflows of your industry before defining the solution.

- **Pharma & Healthcare** — Compliance workflows, appointment systems, AI-enabled care platforms.
- **BFSI & Fintech** — Digital platforms, CRM, workflow automation, AI and analytics.
- **Manufacturing** — ERP, production, inventory, procurement, quality, computer vision.
- **Retail & E-commerce** — E-commerce, POS, CRM, order management, analytics.
- **Real Estate & PropTech** — CRM, listings, lead management, property visualization.
- **Solar & Renewable Energy** — CRM, project tracking, monitoring, site visualization.
- **Education & EdTech** — LMS, student management, learning portals, analytics.
- **Travel & Hospitality** — Booking platforms, CRM, customer and mobile apps.
- **Logistics & Warehousing** — Tracking platforms, warehouse and vendor management.
- **Government & Smart City** — AI surveillance and traffic intelligence, via Smart City AI.
- **Interiors, Construction & Infra** — Project management, quotations, client portals.
- **Steel & Heavy Industry** — ERP, inventory, production tracking, dealer systems.
- **IT & Software Companies** — White-label delivery, dedicated teams, staffing.
- **Trade & Distribution** — Inventory, accounts automation, dealer portals.

ALSO SERVING

HRTech · Agriculture & AgriTech · LegalTech · FashionTech · Jewellery & Luxury · Consulting · Energy & EV · AI Startups · Media & Entertainment · NGOs

> Do not see your industry? We work with all of them — tell us your challenge and we will structure the right solution.

Beyond client delivery. We build products.

Proprietary products built and evolved alongside client engagements.

Nivohra — AI HRTech & Vendor Management

An AI-driven workforce and vendor-management platform that brings hiring, workforce operations and vendor relationships into one system.

ZivoraThemes — AI-Powered Design & Templates

A design and template platform that uses AI to speed up the creation of digital assets and interfaces.

TechTalk — Technology Community & Knowledge

A community and knowledge-sharing platform for technology professionals and businesses.

Smart City AI — AI Surveillance & Traffic

Computer-vision-driven surveillance and traffic-management capability for government and municipal use cases.

BUSINESS SEGMENTS

Startups

Build the product — MVP, SaaS engineering, AI integration, dedicated teams.

SMEs

Digitize and automate — CRM/ERP, automation, web/mobile, AMC.

Enterprises

Transform and scale — enterprise apps, cloud, data, cybersecurity.

Collaborate with us. Sell with us.

We work alongside technology companies, software companies, consultants and agencies — not only end clients. Two ways to partner.

Technology Collaboration

- White-label development
- Technology delivery partnerships
- Product engineering partnerships
- Integration & implementation partnerships
- Dedicated engineering & staffing tie-ups
- Joint solution development

Channel & Sales Partners

- Referral partnerships
- Reseller partnerships
- Co-selling with our team
- Industry & regional partnerships
- Joint go-to-market opportunities
- Transparent commercial terms agreed upfront

Offer your clients a complete portfolio — AI, software, CRM/ERP, cloud, staffing and more — backed by one in-house engineering team and a long-term relationship.

Become a NexziByte partner

How you can work with us.

Fixed-Scope Project

Clearly defined requirements with a set scope and timeline.

Dedicated Development Team

Continuous engineering capacity embedded with your team.

Product Engineering Partnership

For startups and product companies building and scaling a product.

Technology Consulting

Strategy, architecture and technology roadmap.

AI & Automation Engagement

Discovery, prototype and implementation of intelligent initiatives.

AMC / Long-Term Support

Ongoing maintenance and continuous improvement.

Technology & Channel Partnership

White-label, delivery, joint-project, referral, reseller and co-selling models.

> Not sure which model fits? Most engagements start as a conversation about the business problem, not the engagement model. We help you identify the right fit once the scope is clear.

HOW WE WORK

01 Discover

02 Define

03 Architect

04 Design

05 Build

06 Test

07 Deploy

08 Evolve

Why organizations choose us.

- **Every-industry experience** — Solutions designed around real workflows in each industry, not one generic stack.
- **AI-first thinking** — We apply AI where it creates meaningful business value.
- **End-to-end engineering** — From discovery through deployment and support.
- **Product engineering** — We build proprietary products as well as client solutions.
- **Flexible engagement** — Projects, dedicated teams, consulting, partnerships and support.
- **Long-term partnership** — Support beyond initial development, and partnerships that grow with you.
